

# Cosmic influences on human behavior

Astrological theory implies a relation between vocation and birth horoscopes. Dr Gauquelin discovered in studying the birth of 25,000 European professionals listed in Whos Who, that certain planets were found more frequently at the rising or culminating positions in the horoscope. For example, Mars ascended or culminated in the case of athletes with the probability against chance distribution ranging from 1 in 50,000 to 1 in 1,000,000. This work has been internationally recognised as the most important scientific support that Astrology has ever received. Dr Gauquelin has validated the existence of a correlation between the state of the solar system and human experience. Hans Eysenck, a scientist at the London University Institute of Psychiatry, has praised Dr Gauquelins research. Whatever you think about Astrology, this book is a new and important view for sceptics, scientists and astrologers.
