

10 Ways to Fail in the Music Business and how you can succeed by ignoring them. The Story Of My Failed Career (But I Did Touch Kylies Bum).

10 Ways To Fail In The Music Business and how you can succeed by ignoring them

This is the honest story of my experiences in the music business over the past fifteen years, and how, through bad luck and judgement I have failed to make a real success of it. You can learn from my mistakes, whether you want to be a singer, musician, songwriter, producer or a music executive. You should take the decision about a career in the music business very seriously. As Ed Bicknell (famed Dire Straits manager) said to me, The music business is the hardest business in the world and management is the hardest job in music. Thats when I had the great sense to decide that artist management was the career for me. Strangely enough, even though the risks are high and the pay is low for most people involved, music is still a very popular career choice for thousands of hopefuls, although very few get a real chance at an interview, let alone a job. My first boss told me, There is no mystique in the music industry, its just a job. I totally disagree. Its secretive, exciting, fascinating, creative, sometimes glamorous and lots of fun. Very few get the chance be involved with it. If you are a singer, with star potential, (these days they call it the X Factor) or you want to get into Music Management, run a Record Label, A&R, PR, Marketing, Song writing etc, you need to know what youre getting into. I have supplied a general glossary of terms you might need at the end of this book, as well as useful links available on the PDF version. I hope you enjoy my story but more importantly I hope you learn from it and ask yourself some of the tough questions that need to be asked in order to ensure success. Some reviews - Thanks Andrew, Ive just read it from cover to cover.....Fantastic read! Laughed alot, and drew a GREAT many comparisons to some of the mistakes made! :DI spend a great many years as UB40s producer, engineer, programmer, keyboard player, and general dogsbody!! :DMet some great people, that

due to my young age, DIDNT take the meetings any further. Criminal.Still, I wouldnt be where I am now, and its all happened for a reason.That said, I still love song-writing, programming and mixing (proper mixing - SSL etc).If theres anything I can ever do for you, please give me a shout - Ill even offer it for free as proof of product!! :-).Again, thanks for this read - really enjoyed it.All the best,DanThanks for the book. Two chapters into it, Im finding it an enjoyable, interesting read...anyway, it was all very interesting and a lot of the names were familier to me (I was signed to PWL at one stage and Mission Control took care of the PAs etc...). Full of reminisces and useful instructional kinda stuff and it was a fun read for sure.I read your book with pleasure, mostly because of the self-deprecating way you have of describing yourself. I am a pop music idiot, so the names of the big fish you overlooked did not impress me, but I found your sense of introspection and the kicks in the butt you gave yourself later to be refreshing.Some solace: Others, more powerful and experienced than you, overlooked them too.
