

# Tree of Technology Evolution: Ways to New Business Opportunities

The Evolution Tree-based information-processing method presented in this book allows you to effectively analyze large volumes of data and propose new interesting innovative ideas. The book is meant for a wide audience interested in or dealing with innovations, primarily for designers and engineers, as well as for students of technical higher education establishments involved in inventive activities. The material presented in the book will also be interesting to chiefs of enterprises, businessmen, and people promoting new goods and interested in their competitiveness. The methodology is based on the tools used in TRIZ Genrich S. Altshullers Theory of Inventive Problem Solving that proved efficient in solving complicated technical problems.
