

Infantry Small-Unit Mountain Operations: American Survivalist Classic Library

This provides perspective on Infantry company missions in an operational environment characterized by high-altitudes, rapidly changing climatic conditions, and rugged terrain. It also provides the small-unit leader with guidance on how company-sized units and below can conduct these operations. The mountain environment challenges all warfighting functions. Infantry units are full spectrum organizations, not specifically designed for mountain terrain but are well-suited for mountain operations. Successful units combine the basic doctrine described and augment with specialized equipment and predeployment training. The tactics and techniques specific to conducting operations in mountain terrain provide added operational capability. Table 6-3 in this manual depicts where Soldiers may obtain specialized mountaineering and cold weather operational skills. This manual focuses on company and below operations in mountain operational terrain levels II and III specifically, where the influence of increasingly steep and rugged terrain dictates the use of dismounted operations. The concepts discussed in this publication are useful in most mountain environments.
