

The Power Of Numbers

All children deserve the best-why not begin with a name? The power of a name has always been prominent in history. Names are not given by chance or accident; they are attached to us according to our needs, though we are rarely aware of this. Each alphabet in a persons name carries a vibration which lends itself to the individual. The children of the 21st century will face a unique set of challenges. In general, these children will be initiators of a new world order and generations will be more focussed on responsibility in human affairs and will end the 20th centurys unabashed egocentricity. Their ambitions will provide an intuitive sensitivity to world affairs, where the heart will play a more important role than the mind. This book is a numerological guide to naming babies born between 1st January and 31 st December, 2011. It helps parents know the qualities they can expect in their newborns and advises them on how to name their babies in order to support their numerological charts and benefit them over the long term. While a childs date of birth governs his numerological Birth Chart, his name also plays a role in determining his destiny. The inclusion of certain alphabets in the childs name will support his various numerological charts. This book suggests specific sets of alphabets which will help parents choose a numerologically appropriate name. This guide suggests alphabets from the English language according to numerological considerations only which apply inclusively to names of all races, religions and cultures. This book attempts to provide all new parents with the basic knowledge of how to provide a powerful name vibration for their babies.
