

Translation Studies: Critical Concepts in Linguistics (4 Volumes)

Translation Studies has emerged as a thriving interdisciplinary and international area of scholarship. Its rapid growth has been accompanied by diverse forms of translation research and commentary, most falling within, or crossing, traditional academic disciplines such as linguistics, literary criticism, philosophy, anthropology, and, more recently, cultural studies. This new four-volume collection from Routledge brings together foundational and more recent, cutting-edge contributions to the field. The collection is both retrospective and forward-looking, making sense of the past as well as providing pointers towards the future. Fully indexed and with a comprehensive introduction, Translation Studies is an essential work of reference for use by both scholar and student as a vital one-stop research resource.
